Diploma

KSTU named after Razzakov

Languages

Russian — native

English — Pre-Intermediate

Middle Frontend Developer

Frontend developer with 3+ years of commercial experience building production web applications with React, Next.js and TypeScript. Currently leading frontend development of a Next.js web product for the U.S. apartment rental market. Responsible for implementing new features, redesigning the website, maintaining unit and e2e tests, conducting A/B tests and optimizing Core Web Vitals. Previously developed an e-commerce storefront with Next.js SSR and MobX. Experienced with Docker-based environments; basic knowledge of Node.js/NestJS and Go.

June Homes

June 2025 - Present

Responsibilities

- Lead frontend developer of a production web product for the U.S. apartment rental market; owned the frontend direction and day-to-day development.
- Carried out a full redesign of the website: implemented Figma designs by reworking markup, components and application logic
- Discussed UI/UX decisions with the designer to agree on the best approach for the redesign
- Tested the redesign with Playwright and identified mismatches with the designs
- Designed and implemented new user-facing features and maintained the existing frontend
- Optimized high-traffic pages with a focus on Core Web Vitals (LCP, CLS)
- Implemented and maintained A/B tests, unit tests and e2e tests
- Worked with backend engineers on integrations, technical improvements and release planning
- Maintained application configuration; improved Docker builds and frontend environments

Achievements

- Improved performance of key pages and reduced CLS by approximately 20%

Almurut Store

November 2023 - April 2025

Responsibilities

- Developed the frontend of an e-commerce store with React, TypeScript and Next.js
- Used Next.js SSR for server-rendered pages with SEO in mind
- Implemented forms, filters, product cards and product pages with Ant Design
- Managed application state with MobX; typed complex data structures and components in TypeScript
- Set up development environments with Docker and Docker Compose

Kurut-IT

September 2022 - July 2023

Responsibilities

- Developed single-page applications with React + Vite
- Built responsive, cross-browser layouts from Figma designs (SCSS, BEM, MUI, Bootstrap)
- Integrated REST APIs and handled application state and errors
- Took part in feature planning and UX discussions

Frontend

React, Next.js (SSR / SSG / ISR), TypeScript, JavaScript (ES6+), MobX, REST API, HTML/CSS (SCSS, BEM), Ant Design, MUI

Performance & Testing

Core Web Vitals (LCP, CLS), Unit Testing, E2E Testing (Playwright), A/B Testing

Tools

Git, GitHub, GitLab, Docker, Docker Compose, basic CI/CD

Backend (basic knowledge)

Node.js, NestJS, PostgreSQL, Go
